

GRAYSON COUNTY FIRE PREVENTION
Grayson County, Texas

November 28, 2000

Red River Fire Protection Co.
Gordon Hembree

Dear Mr. Hembree:

I have spoke to many of the fire departments that attended your recent demonstration at our fire field. I have also reviewed the test reports and supplemental information you submitted regarding NO-BURN fire retardant product. From the information gathered through our committee members and the information provided we have concluded that the NO-BURN product has proven acceptance and performance. The press seemed extremely pleased with the outcome of the burn presentation.

I have been a fireman for twenty-five years and have seen products come and go. This particular product seems to have the best fire retardant qualities of any other product that I have witnessed. It is my belief that a home or product treated with NO-BURN should have the capability of not only preventing fires, but actually putting the fires out where they start. I would recommend this product to be used in new homes and existing homes. I feel it will help to lower the fire loss in our community and our county.

Thank you for the opportunity to review this new product.

Respectfully,

Phillip Hightower, Chairman
Grayson County Fire Prevention
