our homes speak for themselves with the quality we put in each any every one of them

No-Burn,

2/15/04

I wanted to thank you for making such an incredible product. It's really scary to watch the news and see programs that give us a rude awakening as they show us just how devastating fire can be and how quickly it can snuff out a life. Unfortunately, fires touch everyone's life in one way or another in our lifetimes. It's really good to know that companies like No-Burn are working to help keep us in a safer environment... everyday, everywhere!

Jason Speller, our local No-Burn dealer, approached me with the simplicity of your products, what they can do for our homes, the families that buy them and how they can increase the value of the homes we build. When he explained how easy they are to apply and how they work, I was very interested in your products. My wife is a very safety conscious person, and right away she said "lets treat our houses, what a wonderful idea! Safety should always be first!"

While building our own personal home we had a little incident with a sub-contractor, and we know your product does what it says it's going do.

Since meeting Jason and being introduced to No-Burn, we are SOLD and so are our clients! Our clients who want a custom home built, have asked us to make sure we treat their home. So far we have treated every house we've built here in Randolph County since October 2002.

Your literature for your products hit home with it's specific facts and clarity. I praise you for putting together the Home Fire Safety Kits! We use them as a very special house warming gift for each of our new homeowners. I'd say they are priceless.

Sincerely,

Karl Rundquist, President
